

Company Fact Sheet

Corporate Name:	Nuesoft Technologies Inc.
Headquarters:	1685 Terrell Mill Road Marietta, GA 30067 800.401.7422
Number of Employees:	50
Corporate Overview:	<p>Nuesoft Technologies is an application service provider (ASP) of practice management software for physicians' offices, university health centers and billing centers. Unlike competitors' systems that are delivered through a Web browser, Nuesoft delivers its software products via a direct connection from a user's workstation to a highly protected environment using the Internet as a conduit.</p> <p>A privately owned company, Nuesoft was founded in 1993 through an incubator program at the Georgia Institute of Technology's Advanced Technology Development Center (ATDC), and offered the first platform independent software to the medical community. Nuesoft has an established U.S. customer base, with more than 7,000 medical providers covering almost 100 specialties across 49 states, as well as an international presence. Nuesoft also serves as an independent clearinghouse, and processes more than 3.5 million electronic data transactions per year.</p>
NueMD® Division	<p>NueMD® is the leading Internet-based medical management solution for physicians' offices. Core functionality includes an appointment scheduler, patient registration capability, ticketing module, insurance claims and statement processing, capitation reimbursement, insurance batch posting, comprehensive reporting and statistical analysis, and an electronic medical record. NueMD integrates all office functions, enabling physicians to more efficiently manage their practices and, in turn, increase profitability.</p>
Nuesoft Xpress™ Division	<p>Nuesoft Xpress™ is a full featured, Internet-based software solution for college and university health and counseling centers. Ideal for the small- to mid-sized school, Xpress includes all of the features prevalent in NueMD, along with an immunization compliance manager, and an online student health center. In addition, the Nuesoft Xpress system connects to a school's university-wide student information system for the automatic transfer of student demographics and financial information.</p>
